

Vision 1000 Pop-Up Display System

SET UP INSTRUCTIONS

1. □ Your display comes in either one oval case or two semi-oval cases. Unpack the frame and channel bars.

2. □ Expand the frame. Make sure the frame is right side up - the row of silver knobs is the base of the frame.

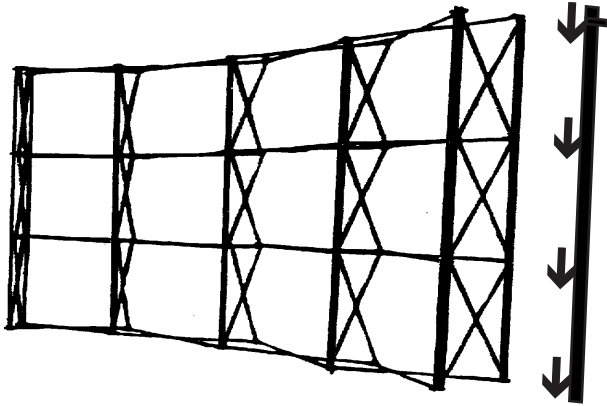

3. □ Attach all connectors together to stabilize the frame. (Note: To unlock, simply press the top of the connector.)

4. □ Hinged channel bar is set by expanding the top and bottom sections so the channel bar is vertically straight.

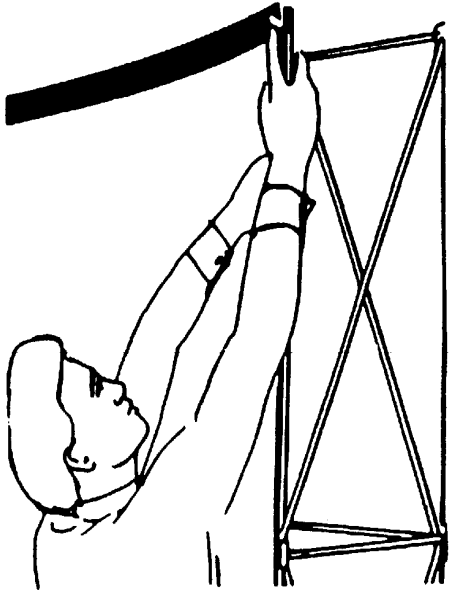

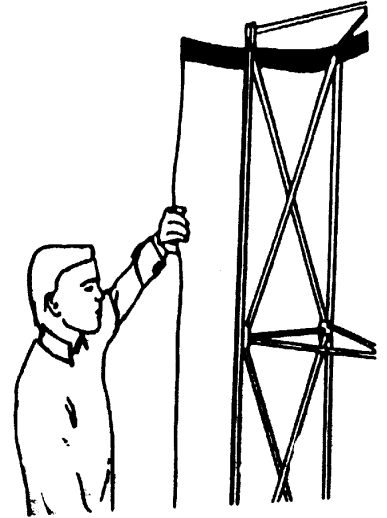

Vision 1000 Pop-Up Display System

5. While holding the top and bottom sections of the channel bar, slide it onto the frame. Make sure the channel bar is connected to each hub. Follow this procedure until all the front side of the frame and the corner row on each side of the back of the frame are attached by channel bars.

6. Unpack panels. Attach the end panels (these are smaller panels in the curve system) by hooking up the panels to the end screw on the channel bar at the corner of the frame and wrapping the panel around to hook on to the other corner screw on the channel bar located at the back corner of the frame. Align magnet.

7. Attach the larger panels to the front side of the frame by simply hooking up to the screw heads on the channel bars and aligning the magnet.

8. When repacking the panels make sure the fabric/graphic mural side is on the outside of the roll. Roll panels individually. DO NOT roll two or more panels together.
