

Vision STAR Pop-Up System

SET UP INSTRUCTION

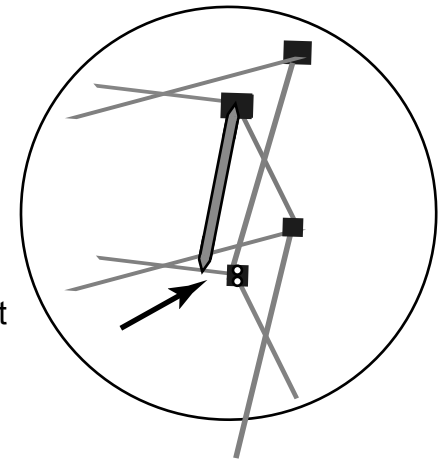

1. □ Your display comes in either one oval case or two semi-oval cases. Unpack the frame and channel bars.

2. □ Expand the frame. Make sure the frame is right side up - the row of hubs containing three magnets each is at the top of the frame.

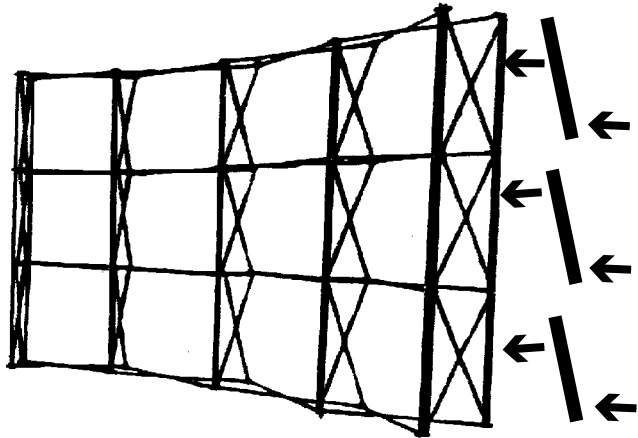

3. □ Expand the system until the connector magnets snap together.

4. □ The vertical struts are installed by inserting one end of the strut against a magnet on a hub and pressing the other end into the next hub until the magnets make contact.

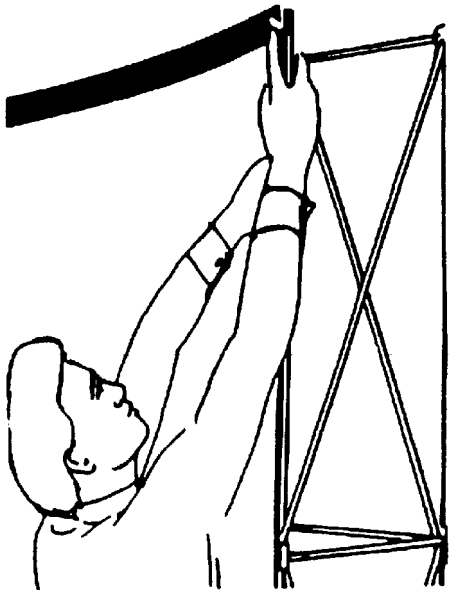

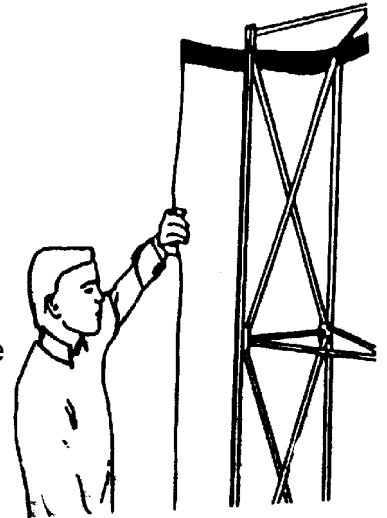

Vision STAR Pop-Up Display System

5. □ Repeat the procedure to insert the vertical struts for the complete front side of the frame and the corner row on the back of the frame.

6. □ Unpack panels. Attach the end panels (these are smaller panels in the curve system) by placing the magnet behind the top corner of the panel against the magnet at the top of the front corner of the frame and wrapping the panel around so the magnet on the other side of the panel goes against the magnet on the back corner of the frame. Align magnets on the sides of the panels to the magnets on the struts.

7. □ Attach the front panels to the front of the frame by simply putting the magnets at the top of the panels against the magnets at the top of the frame and aligning the magnets on the sides of the panels with the magnets on the struts.

8. □ When repacking the panels make sure the fabric/graphic mural side is on the outside of the roll. Roll panels individually. DO NOT roll two or more panels together.
